

1	1 - click system clock in bottom right corner of D2D 2 - select Set Time and deselect Freeze Time 3 - set clock back 5 seconds and click OK	WarnGen will now operate in Test mode			
2	Issue a warning	Ensure the TEST...warning...TEST is in the MND header and the VTEC line appears as /T.NEW.Kxxx etc. The ETN will advance as this warning will be disseminated. This is correct.			
8	1 - click system clock in bottom right corner of D2D 2 - ensure “Use current real time” is selected 3 - click OK	AWIPS clock will be back to normal
